form that are almost continually around us. It is surprising how many people suffer from iron deficiency and do not know it. If you are not strong or well you owe it to yourself to make the following test: How long you can stand on your toes, how long you can walk on your toes, how long you can walk on your heels. Next take two five grain tablets of **Iron** and stand three times per day after meals for one week. Then test your strength and you will know the difference.
